variable tag: $Variable$

HTML Text Formatting Tags

- HTML uses tags like <b> and <i> for formatting output, like **bold** or *italic* text are called HTML formatting tags.
- <b> or <i> defines bold or italic text only.
- <strong> or <em> means that you want the text to be rendered in a way that the user understands as "important". Today, all major browsers render strong as bold and em as italics. However, the browsers of future might change their options to represent strong and emphasizes text.

Example   demo!!!

- **This text is bold**

This text is italic

This is computer output

This is $_{subscript}$ and ^{superscript}
